Thinking Outside the (Window) Box—Other Uses for Sprayers

Gardening enthusiasts love Chapin's new line of sprayers for fertilizing and weed control because of its anti-clog filter, chemical-free nozzle and bold new design. These features also make sprayers ideal for other household tasks, and because of their reasonable price, homeowners can easily afford to have several on hand. Below is a "steady stream" of ideas these versatile little devices can be used for:

- **Deck, Fence and Patio Care** It is easy to forget about these "background elements" when concentrating on producing a beautiful garden, but decks, fences and patios require some routine maintenance. Use a quality deck cleaner for cleaning, and spray a waterproofing seal in the early spring or fall to protect them from the harsh weather. Sprayers are also ideal for applying wood preservatives or stains.
- **Plant Care** Give thirsty plants a drink or mist them with a sprayer. Chapin's sprayers are so compact and attractive, they can easily be stored in a corner when not in use.
- **General Household Cleaning** Whether its rinsing soap scum off the shower walls or spraying cleaner on the floor for a quick mop-up, sprayers are an easy way to effectively clean and sanitize the home.
- **Outdoor Cleanup/Maintenance** Don't bother with cumbersome hoses and heavy equipment when cleaning windows and siding. Give the outside of your house a spring spruce-up with a Chapin sprayer. Sparkling windows and patio furniture are only a spray away. Use the sprayer for cleaning screens, too, by taking them off the windows, spraying outside with warm, soapy water and laying them out in the sun to dry. Sprayers are also great for getting rid of dirt and grime on aluminum and vinyl siding.
- **Pet Bathing** Fido has never had it so good. Instead of drenching him with a stream of ice-cold water from the hose, fill a Chapin sprayer with lukewarm water for washing and rinsing. Just make sure this sprayer is especially designated for pet use and wasn't previously filled with harsh gardening or cleaning chemicals.
- **Cars, Boats, ATVs, Personal Watercraft and RVs** Use a Chapin sprayer to wash, wax and degrease your cars, boats and RVs. The convenient design and powerful spray ensure you'll spend less time cleaning them and more time enjoying them.
- **Wallpaper Removal** Wallpaper manufacturers recommend you saturate the wallpaper with a glue dissolvent before scraping it off, which can be a tedious task. A sprayer can cover a larger area with greater control, which means less arm fatigue.
